Instructional Design | Learning Experience Design | Needs Analysis | Storyboarding | Curriculum Strategy | Scenario-Based Learning | Blended Learning (ILT, VILT, Self-Paced) | Design Standards and Governance | Facilitator Guides and Workbooks | Train-the-Trainer | Learning Analytics and Evaluation | Generative AI for Learning Design | Change Management | Stakeholder and SME Management

TOOLS

Articulate 360 (Storyline, Rise), Adobe Captivate, Vyond, Camtasia, LMS platforms, SCORM, AI learning tools, learning analytics and reporting, MS Office

PROFESSIONAL EXPERIENCE

Learning Experience Manager (L6), Amazon
Pune, India | Apr 2026 – Present

Promoted to Learning Experience Manager (L6) for my work leading Customer Service learning; scope expanded from learning programs to design standards, governance, AI-enabled learning and marketplace onboarding across MENA and other regions.

- Own Learning Design for Amazon Business Customer Service, responsible for the design, development and delivery of training interventions for 5,000+ customer service associates.
- Launched Recharge in Amazon Business, a refresher program for tenured customer service associates that combines focused content with AI-powered practice scenarios (customer personas with instant feedback). First module, "Shipment Is Late": 4.13/5 learner rating, 78% content favourability, about 92% completion of 199 assigned associates and 87% survey response; directionally positive impact on customer experience, +96 bps for trained associates and +12 bps at network level.
- Champion adoption of design tools and standards across the Customer Service Design team: own, plan and run a monthly activity-based workshop for the APAC and other CS Design teams, a weekly learning series on Slack, fortnightly office hours and a standing tools-and-standards slot in weekly team cohorts; adoption of design tools and standards increased by 20%.
- Define team-level design standards and learning governance frameworks, and lead onboarding programs for marketplace launches across MENA and other regions.

Senior Instructional Designer | Learning Program Manager, Amazon Business
Pune, India | Apr 2020 – Apr 2026

- Built and led the Continuous Learning Program from the ground up, a data-informed development program for new and tenured associates that contributed to an 18% year-on-year improvement in associate performance and a 30% increase in learner engagement.
- Designed instructor-led training ecosystems, including facilitator guides, participant workbooks, scenario-based activities and workshop materials used by global delivery teams.
- Led learning enablement for marketplace expansions in Mexico, Australia and MENA, designing end-to-end onboarding programs for launch readiness and consistent customer experience standards.

- Led AI-enabled learning initiatives: AskLX/LeXi (conversational assistant for process guidance), LX Solution Advisor (recommends targeted learning interventions from performance data) and AI Roleplay Simulations piloted for High-Value Actions training.
- Established SOPs, governance standards and content frameworks, and owned branding assets, visual templates and standards, to keep quality consistent across global learning materials.
- Conducted Train-the-Trainer programs that improved delivery quality and consistency across regions.
- Partnered with Operations, Quality, Product and global Learning teams to identify skill gaps and measured impact through performance metrics, learner feedback and behavioural indicators.

Lead Instructional Designer, Customer Enablement and Education, MindTickle
Pune, India | Jul 2014 – Mar 2020

- Reduced enterprise customer ramp-up time by 35% through structured blended certification pathways.
- Played a foundational role in establishing MindTickle University, a paid customer education and certification program: blended learning architecture, certification pathways and content ecosystem.
- Designed and delivered self-paced, blended and instructor-led programs for enterprise customers including AWS, Cisco, GSK, Nutanix and Ola, supporting onboarding, adoption and advanced use cases.
- Managed a team of 12 instructional designers.
- Laid the foundations of the Customer Enablement webinar program, in which MindTickle product and UX managers walked customers through platform features and capabilities; managed and organised 28 webinars and hosted 20, increasing customer engagement by over 20% and feature and capability adoption by over 18%.
- Conducted in-person and virtual workshops for enterprise customers including GSK and AWS, each with 25+ attendees over 3 to 5 days, contributing to customer engagement gains of over 15% and feature and capability adoption gains of over 20%.
- Created and launched fortnightly and monthly customer newsletters, designed by me and sent by email and through the in-app chatbot to platform admins, covering best practices, tips and upcoming releases; achieved an open rate above 73%.
- Built a library of customer education assets: playbooks, product walkthroughs, demo scripts, assessments and LMS modules.

Senior Instructional Designer, Upside Learning Solutions
Pune, India | Apr 2013 – May 2014 (Associate Instructional Designer, May 2012 – Apr 2013)

- Led instructional design projects end to end for global clients: needs analysis, instructional design documents, storyboarding and content treatment across concurrent engagements.
- Worked with SMEs, graphic designers and developers to keep instructional integrity across final learning assets.

Correspondent and Copy Editor, The Times of India (BCCL)
Pune, India | Jun 2008 – Apr 2012

- Researched, wrote and edited content under tight deadlines, building clear, audience-focused writing that carries into instructional design.

EDUCATION

Master of Arts, Communication and Journalism, University of Pune (2008)
Bachelor of Commerce, Marketing and Advertising, University of Pune (2005)
